Welcome To Rendercv!

RenderCV is a LaTeX CV/resume framework. It allows you to create a high-quality CV as a PDF from a YAML file with **full Markdown syntax support** and **complete control over the LaTeX code**.

A substantial part of the content is taken from here, where a *clean and tidy CV* pattern is proposed by **Gayle L. McDowell**.

Quick Guide

- Each section title is arbitrary, and each section contains a list of entries.
- There are seven different entry types: *BulletEntry*, *TextEntry*, *EducationEntry*, *ExperienceEntry*, *NormalEntry*, *PublicationEntry*, and *OneLineEntry*.
- Select a section title, pick an entry type, and start writing your section!
- Here, you can find a comprehensive user guide.
